[Remediation Ltr 1989.pdf](#)

Good Morning Debbie and Denise,

As there are 8 hours left before the next community meeting, I'd appreciate your statement of acknowledgement and/or reply for this letter from the Director of the Office of Nuclear Material and Safeguards from 1989.

I'd also be interested in a cost analysis of how much the EPA has spent on non-removal since 1989.

I look forward to hearing back from you, Denise, regarding that statistical probability of my health issues.

I appreciate your urgent attention to this matter, as tax-paying citizens in St. Louis are dying because of this, and the EPA has "studied" long enough. Even if full funding is required through a congressional Superfund approval, the EPA is the current government entity that manages the site. Until it can be remediated properly by FUSRAP (keeping in mind that US has spent nearly \$1 Billion to remediate other areas of Coldwater Creek while the EPA has been "studying"), it is up to the EPA to protect the environment, not the agency, I urge you to please consider the facts, and then please help.

Sincerely,

Ex. 6 - Personal Privacy

Subject: Westlake Landfill Remediation Document - 1989

Debbie & Denise,

Thank you both for speaking with me today. As I hope you both understand, this is an emergent health crisis that has not seen removal action as recommended since 1989 and we need action-oriented people that will consider the questions, "What if this was happening in my community? What would I want the person in my position to do?". PLEASE give this the urgent attention it so deserves. I look forward to hearing back from you as soon as possible with regards to statistical probability for my health issues, and also a statement for the Community Meeting this Thursday.

Thank you,
